MAIN FEATURES

• Dust-free system

The CP-D70DW is ideal for environments that suffer a higher level of pollution or dust. It has in-built separators that are designed to circulate the air more efficiently, keeping the heads separated from the power supply and reducing the level of contamination in the printing zone.

• High resolution

Mitsubishi Electric printers have a new image processing system that makes it possible to reproduce softer edges and more natural pictures at 300DPI.

• Energy saving

With consumption of less than one watt, the CP-D70DW is designed to reduce energy consumption up to 96% in sleep mode compared with other Mitsubishi Electric models.
